**STUDYING AT THE UNIVERSITY OF  
APPLIED SCIENCES BURGENLAND**

# Welcome to the University of Applied Sciences Burgenland!

Georg Pehm  
Managing Director

We are different, unique and much more than that. At our study centres in Eisenstadt and Pinkafeld, students are offered unique and practical study programmes. And we've been offering such programmes for more than 25 years.

We are looking forward to a great development in our areas of research and are paying special attention to innovation.

We combine **UNIVER**

## College students

We accompany people on their way to earning an academic degree and full-time and part-time students find us to be a reliable partner. They particularly appreciate the personal atmosphere at our institution.

## Employees

Exceptional people are doing exceptional jobs at the UAS Burgenland. Our employees are the backbone of our university. An appreciative approach and team spirit are important to us.

## Instructors

We build on the optimal mix of scientific lecturers and experts from the respective professional fields. A large number of the lecturers at the UAS Burgenland work in companies and pass on their practical knowledge to the students. Our teaching staff is multifaceted with wine growers, technical managers, doctors, start-up founders and diplomats with an extensive international network.

Interested students can choose from a wide range of Bachelor's and Master's degree programmes in five areas. We offer service and support for full-time students as well as for part-time students. Quality in teaching and research is regularly confirmed by external audits.

Gernot Hanreich  
Rector

## SITIES&PARTNERS

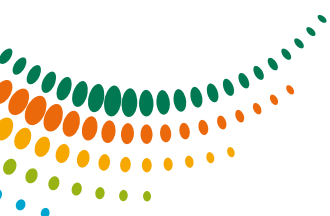

### Alumni

We are proud of our more than 7,000 graduates. Their interesting professional positions – nationally and internationally – bear witness to the quality and topicality of the training they received at the UAS Burgenland. The alumni association offers them networking opportunities.

### University partners

Internationality is important to us. More than 80 university partners in 24 countries help us and our students to think outside the box.

### Companies

We have close ties to the economy. Experts from the field are involved in teaching, trust in our research capabilities and welcome interns and alumni from our institution with open arms.

### FHK – Fachhochschulkonferenz (Austrian Conference of Universities of Applied Sciences)

As a committed member of the Austrian Conference of Universities of Applied Sciences, we take advantage of the opportunity to contribute content and appreciate the joint work on the continuous expansion of the attractiveness of the sector.

We combine **LEARNING&CENTER**

## Pinkafeld: Town in the South

Nestled in the southwest of Burgenland, Pinkafeld is located only a few kilometres from the borders of Lower Austria, Styria and Burgenland. The landscape is characterised by rolling hills and the foothills of the Wechsel massif. Pinkafeld is a young, vibrant university town which offers a wide range of leisure activities. In the middle of Burgenland's thermal spa region, students will enjoy the quality of life there and the personal atmosphere on the campus.

## Eisenstadt: City of Culture

Eisenstadt is Austria's smallest federal state capital. It was once one of the Esterházy royal capitals and has much to offer, including late Gothic arcades, Baroque facades, the Esterházy castle, the beautiful St. Martin's Cathedral and the heritage-protected old town. Just 20 minutes from Eisenstadt, students will find yet another reason why studying here is so enjoyable, namely the recreation and conservation area around Lake Neusiedl, Europe's largest steppe lake.

## We combine **STUDIES&AREAS**

### Department of Business Studies (with a focus on Central-Eastern Europe)

We train leaders of the future to shape the future. A particular feature of our courses is the focus on Central and Eastern Europe. Our students learn the languages of Eastern European countries but also become experts in their economies and cultures as well as economic theory. This will later boost our student's CVs and ultimately their employability.

### Department of Information Technology and Information Management

“Information“ lies at the heart of this department. The future-oriented study programmes focus on information and knowledge organization, IT infrastructure management, online marketing and online communication, mobility and networking in the cloud or the design of business processes from an economic and technical point of view. Cooperation with business partners, innovation and a lot of practice are particularly important.

### Department of Social Work

The Department of Social Work gives undergraduate students the opportunity to combine social work and social science subjects. The main focus in this degree programme is on developing both methodological and hands-on competencies. Students are offered a wide range of character building activities and practical experience to help them on their way. There is a unique emphasis on child, youth and family welfare.

## Department of Energy and Environmental Management

A degree in Energy and Environmental Management stands for a sound technical education combined with economic and legal management aspects. Students can actively participate in top-class research and development – especially in the fields of energy and environmental management, energy and environmental technology, sustainable energy systems, as well as building technology, automation and management.

## Department of Health

In the Department of Health, future-oriented Bachelor's and Master's degree programmes offer scientifically sound, practice-oriented vocational training. The focus is the promotion of health, health and health care management as well as care and physiotherapy. In all programmes, the teaching of subject-related, methodological, social and occupational competencies is a top priority.

**You will find more information about the UAS on our website: [www.fh-burgenland.at](http://www.fh-burgenland.at)**

## PhD Programmes

Since 2014, the UAS Burgenland has been offering cooperative, cross-border and international doctoral programmes in cooperation with renowned international universities. PhD-students spend their first year at the UAS Burgenland in Eisenstadt. Then they are sent to one of our partner universities for the second and third academic year, depending on the research area the PhD-students have selected.

The programmes are taught in English. The academic title earned is recognised worldwide.

## We combine ORGANIZATION & STRUCTURE

The University of Applied Sciences Burgenland is 100% owned by Landesholding Burgenland, a 100% company of the State of Burgenland.

With four subsidiaries, the UAS Burgenland is involved in promoting research, continuous academic education, professional qualifications in the public sector and health-promoting measures for businesses.

The association „alumni FH Burgenland“ is responsible for networking with and among graduates.

### Forschung Burgenland – the research subsidiary

The 100% subsidiary of the UAS Burgenland is dedicated exclusively to research and development. The spectrum of research activities ranges from large international projects to pin-pointed contract research carried out for SMEs and the industry.

At the Pinkafeld site, experienced scientists conduct research projects with high innovation potential and involve students, who benefit from a high-tech energy and environmental technology laboratory and a health laboratory.

The „living lab“ Energetikum is „state of the art“ in terms of energy and building technology.

At the Eisenstadt location, eye-tracking and IT-labs are available for innovative market research studies or research regarding e-communications, e-learning, media, knowledge management and IT-security.

### Akademie Burgenland – professional qualifications in the public sector

Since 2014, the Akademie Burgenland has been offering attractive, varied and high-quality training and continuous education programmes for employees in the public sector.

At two locations – in Eisenstadt and in Pinkafeld – seminars and courses are held which are tailored

to meet the needs of the various occupational groups and specialist areas.

This enables the state and municipal employees as well as employees of companies within the Landesholding Burgenland to increase and update their professional skills.

[www.akademie-burgenland.at](http://www.akademie-burgenland.at)

## readyforhealth

readyforhealth is a UAS Burgenland research spin-off. The Department of Health teamed up with the AUVA – a large state health organization – to develop a health report system for health and safety management in companies. readyforhealth supports companies competently and in a goal-oriented way in all topics of company health and safety management, as well as in the evaluation of psychological stress at the workplace.

## alumni FH Burgenland

alumni FH Burgenland sees itself as a network partner for students, graduates, science, business, sports and politics. Graduates are highly esteemed „ambassadors“ of the UAS Burgenland - in scientific, economic, socio-cultural and social matters at home and abroad.

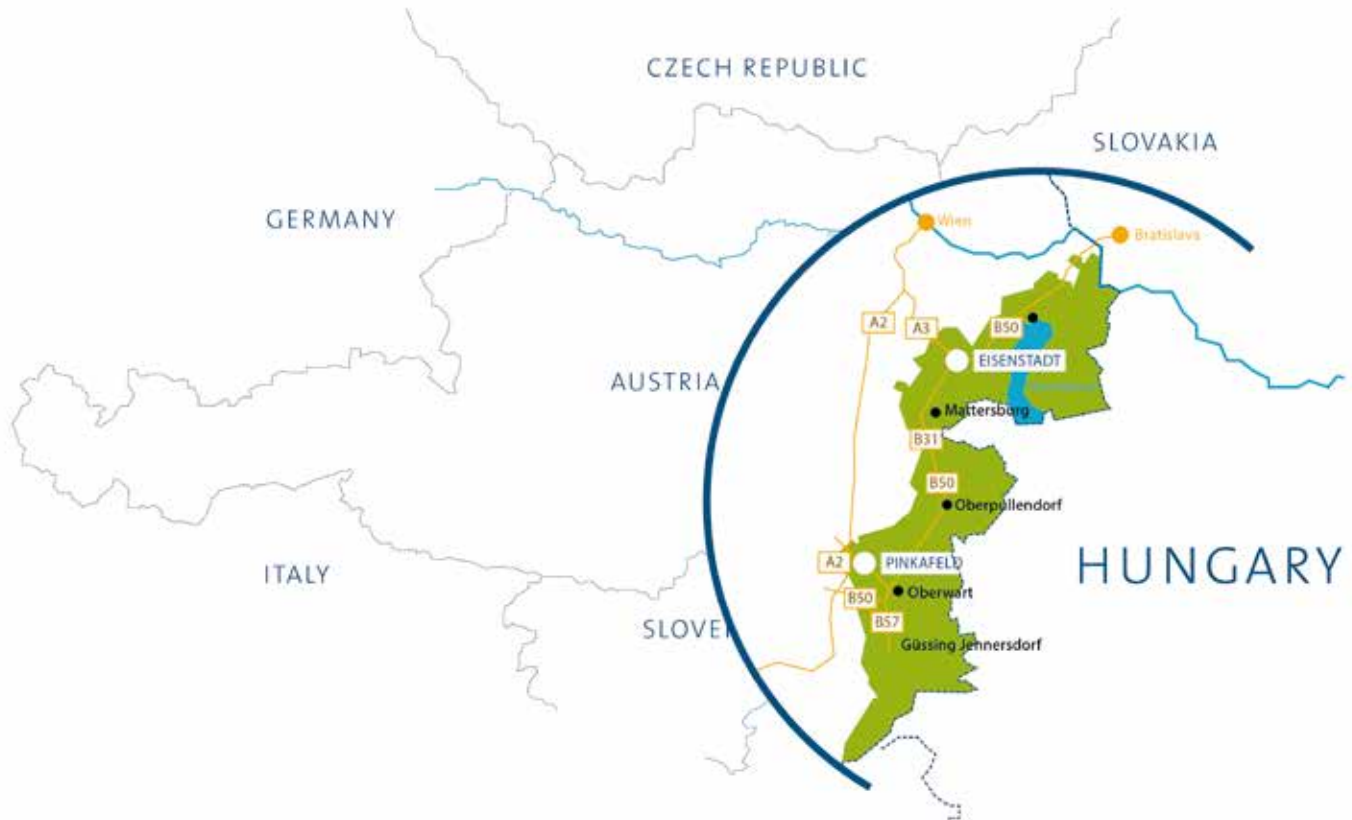

[www.fh-burgenland.at/alumni](http://www.fh-burgenland.at/alumni)

## AIM – MBA Courses

The AIM – Austrian Institute of Management – is part of the UAS Burgenland and offers people with a professional background the opportunity to gain an academic qualification. AIM's distant MBA programmes guarantee maximum flexibility and make it possible for students to work full-time and still do an MBA. The UAS Burgenland council is an expert panel dedicated to ensuring high quality learning environments. The constant alignment of the study programmes with the current state of science and industry is very important to the council.
