

BACHELOR INTERNATIONAL SUSTAINABLE BUSINESS*

Bachelor's Degree Programme

International Sustainable Business[☆]

“Organisations in the private, public, and non-profit sector understand business today is subject to transformation. Doing business in the 21st century considers resource efficiency and values innovation. A Bachelor's Degree in “International Sustainable Business, provides graduates with the much needed skills, competences and mindsets to integrate and establish sustainability concepts in all relevant business processes.”

Josefine Kuhlmann, Programme Director

If you want to be part of an international student network, want to grow and inspire others by learning from global best practice examples and lay the groundwork for future-orientated and sustainable ways of doing business, this is your course programme of choice!

** subject to the approval of AQ Austria*

Admission process Interview

Programme Structure and Curriculum

Students attend the modules depicted below and complete the programme by passing a final exam.

General Business Studies: Business management modules that are largely based on traditional concepts but supplemented by new, sustainability-oriented approaches.

Sustainable Business Studies: Modules in the fields of business management and economics with an international and global focus, which solely or mainly deal with sustainability-oriented concepts

Data Management and Law: Relevant basic knowledge in the fields of natural sciences, IT and data use as well as law

Sustainability Skill Set: Competences particularly relevant in the context of integrating, implementing or developing sustainability-oriented business management. These include a basic understanding of science, thinking and decision-making processes, social behaviour patterns as well as excellent communication skills

Independent Application of Knowledge: Bachelor's thesis, internship and bachelor's exam as the part of the study programme that allows independent and autonomous application of the knowledge and competences acquired

Fachhochschule Burgenland

FH BURGENLAND. UNITING THE EXCEPTIONAL.

The University of Applied Sciences Burgenland (FH Burgenland) offers bachelor's and master's programmes in five departments at two campuses in Eisenstadt and Pinkafeld:

- Business Studies
- Information Technology
- Social Work
- Energy & Environment
- Health

We focus on future-relevant topics; personal support and practical orientation are priorities in teaching – and all that comes without tuition fees!

Exceptional Growth

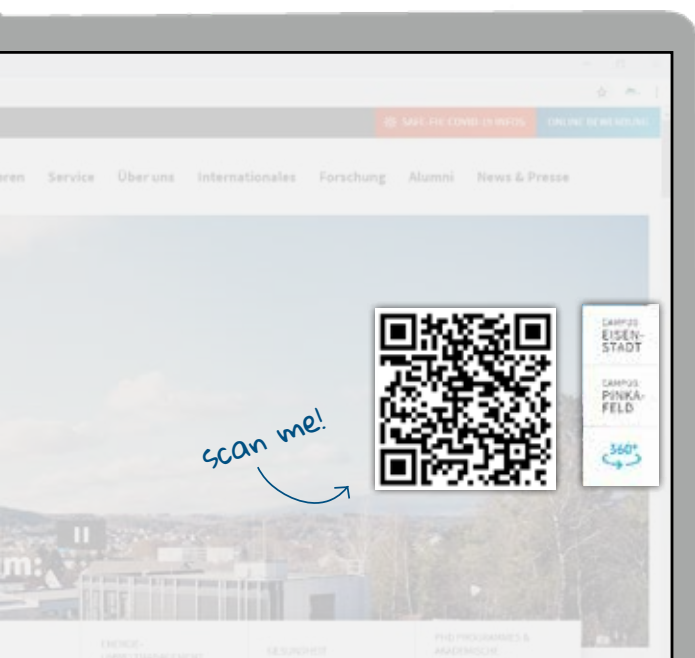

A unique community of expert teaching staff (from the respective fields) accompanies and supports future leaders along their path to success – a path characterised by interculturalism, regionality, research and innovation.

A Lifelong Network

More than 10,000 students have graduated from FH Burgenland; upon graduation they have not only received their diploma, authorising them to hold an academic title, but also the positive outlook necessary for their future career.

Follow us on our virtual tour around the study center in Eisenstadt:

The Campus in Eisenstadt

With approximately 10,000 square metres of space, the Eisenstadt campus offers both auditoriums and classrooms of various sizes, as well as a well-stocked library to facilitate studies. On-campus instruction is further enhanced by research in the media lab or in the market research labs. Common areas allow to enjoy short breaks and interaction with other students. A dormitory and cafeteria are located on the campus; parking is available in front of the university building. A fitness studio, stores and restaurants are within walking distance.
