TO ACHIEVE THE EXCEPTIONAL

DOCTORAL • STUDIES SCIENTIFIC CONFERENCES

„Scientists, researchers and early-stage doctoral candidates exchange their innovative knowledge on conferences, congresses, symposia and meetings: you are cordially invited to do so in two multi-disciplinary conferences, dedicated to examining, comprehending and discussing relevant expertise and excellency in research. Welcome to the University of Applied Sciences Burgenland!“

Doctoral Programme Director and Head of Academic Scientific Committee
Univ.-Prof. Dr. Sc. Dr. h.c. Irena Zavrl Ph.D.

Thursday, May 9 // 9.30-17.30 // UAS Burgenland

International Scientific Conference for Doctoral Students and Early Stage Researchers for International Economic Relations and Management

Friday, May 10 // 9.00-15.30 // UAS Burgenland

International Scientific Conference for Doctoral Students and Early Stage Researchers for Educational & Communication Sciences

Saturday, May 11 // 14.00 // Esterhazy castle

The first doctoral candidates are offered the opportunity to celebrate their graduation from our JOINT DOCTORAL STUDIES by taking part in a graduation ceremony

„Since 2014 the University of Applied Sciences Burgenland in cooperation with internationally renowned partner universities has been offering two joint, collaborative, interdisciplinary and cross-border part-time doctoral study programmes: the “International Joint Cross-Border PhD Programme in International Economic Relations and Management” and the “International Cooperative Cross-Border Interdisciplinary Doctoral Programme in Educational & Communication Sciences”. Both doctoral programmes, accredited on the national and European level by the Austrian Accreditation Agency for Quality Assurance (AQ), are conducted in English and provide scientific education according to international academic standards, enabling doctoral candidates to conduct independent research work in their respective field of expertise. Innovation and research-focused, both scientific conferences aim to present and discuss the most recent research findings of doctoral students and early-stage researchers pursuing their studies, enabling them to present results of their research-in-progress and at the same time get feedback from other peers as well as distinguished professors and experts from the respective partner universities.

PANNONIA • INTERNATIONAL

THREE UNIVERSITY EVENTS IN ONE WEEK

„The whole week of Europe Day on 9 May is all about Europe and internationality at the University of Applied Sciences Burgenland. The first part, Building Bridges - European Staff Week from 6 to 9 May, will be followed by the Scientific Conferences on 9 and 10 May, which will lead to the Europatage - Business Forum Eisenstadt on 10 and 11 May. We invite colleagues from all over the world to discuss with us, to network, to get inspiration and to find solutions for current challenges together!”

Prof. Dr. Michael Roither
Vice Rector for International Affairs

BUILDING • BRIDGES

EUROPEAN STAFF WEEK

„Dig in! Digitalization and Internationalization: Challenges and Opportunities for Universities“ is the main theme of Building Bridges 2019. What do digitalization and internationalization mean for administration, lecturing and didactics at universities? What can we learn from each other in that regard, and where can we possibly work together? How can universities survive in global competition, what ideas, creative measures and initiatives are there for this in Europe?

These and many other questions are at the heart of European Staff Week. Building Bridges invites colleagues from administration, lecturing and didactics to discuss important current topics together, to be inspired by keynotes and to network during and after the programme in beautiful Burgenland, near Vienna. The event sees itself as a platform that presents inputs from the participants in many aspects of the programme and uses them as a basis for discussion: Learning from each other and with each other in order to better master the challenges of the future.

EUROPA • TAGE

BUSINESS FORUM EISENSTADT

The University of Applied Science Burgenland, Department of Economics, hosts its flagship convention, the Europatage – Business Forum Eisenstadt, for the 23rd time. Every year, international speakers and guests meet here for two days to discuss topics of European and global relevance. “The Myth of Europe – Europe’s role in the World” is the guiding theme of this year’s convention. The theme was selected to delve into questions such as how innovative, competitive and relevant Europe still is from a global geopolitical perspective. Although Europe is home to many hidden champions in the technology sector, reports of innovative megaprojects tend to emerge out of Asia. Although Europe is home to many languages, when it comes to communication technologies one tends to first think of the USA. Although Europe is a densely populated continent, population growth is more associated with Africa. Is the old continent still keeping up with time? Does it still play a role in world politics? How important is Europe as an economic power?
